Hardik Agarwal

Senior Product Designer

Product Designer with **5+ years** across AI, enterprise B2B platform and consumer products. Rated **Outstanding** at Microsoft, where I lifted Store developer onboarding from 35% to 73% and cut it from ~15 days to ~1 day. Designs end-to-end, from product strategy to prototypes in code with AI, and mentors junior designers.

Experience

UX Designer

Microsoft · Mar 2025 - Present

- Redesigned Microsoft Store company account onboarding — lifted success **35%** → **73%**, cut onboarding **~15 days** → **~1 day**, scaling to 240+ companies across 50 countries.
- Led design for the Trusted Developer Program pilot with Microsoft PC Manager (20 apps, **313K+ trust dialog views**) and developer identity verification concepts, grounded in research with 100+ participants.
- Raised craft in Windows Hello and passkeys — triaged 30+ usability issues, contributing to 20% fewer craft bugs, System Usability Scale **79.5** → **83.2**, and a 12% lift in biometric enrollment.
- Standardized Copilot Sports answer cards — the AI result surface for cricket, tennis, motorsports and American football — into a reusable schema enabling 4 new sports per cycle.
- Mentored junior designers and drove AI-assisted design practice — Claude Code and Figma MCP workflows, design-to-code prototyping, and agentic prototypes demoed to 30+ cross-functional stakeholders.

Senior Associate UX Designer

Microsoft x Tech Mahindra · Feb 2023 - Jan 2025

- Designed search answer modules for Bing Search, serving **1M+ user queries monthly**.
- Optimized Bing Travel across flights, destinations, hotels and car rentals — 20% improvement in booking success.
- Led user research and usability testing that raised post-interaction satisfaction scores 45%.
- Contributed core components to the Bing design system, used across 5+ major products, and cut design signoff turnaround 40%.
- Revamped an SMS Organizer app, increasing user engagement 30%.

UI/UX Designer (Visual Designer)

PlayShifu · May 2021 - Jan 2023

- Owned UX, UI and visual design for 6+ AR STEM games for children aged 6–12 on iOS and Android, lifting educational engagement 40%.
- Led the 3D avatar team from concept art to app integration — swappable avatar system improved resource reuse 20% and enabled customization for **10,000+ users**.
- Converted traditional HUD UI to diegetic (world-space) UI for VR, raising interaction rates 35%.
